

## Skin laser treatment

Laser treatment can remove birthmarks.

Laser makes the birthmark less red.

Cream is put onto the skin to make it numb.

The laser is pressed on the skin lots of times.

The laser removes colour in small areas called laser dots.

After the laser treatment you will get a cold dressing.

## Skin laser treatment

After laser treatment:

You can bathe or shower, but don't use soap.

3

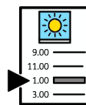

Don't go swimming for three weeks.

Put on sun cream all year round.

You will go to hospital for a check up.

The doctor may make another appointment for laser treatment.
